

eLeDia is the official German partner in the international Moodle network. We are offering Moodle learning management platform services in corporate environments, for governmental organizations, training companies, universities and schools. eLeDia is developing customized solutions for a wide range of learning scenarios for our clients. Actual we are working for several hundred clients.

We are looking for one/two fulltime

## Linux Server Admins

in our main office in Berlin.

Your tasks:

- Set up and maintenance of linux based webservers (Debian, Redhat), classical servers, virtual machines and cloud systems.
- installation and optimization for Apache WebServers, PHP
- installation and optimization for databases (MySQL and PostgreSQL)
- basic knowledge in PHP
- developing future concepts for our server environments
- monitoring of server farm
- monitoring and optimization for hosted Moodle systems.

We can guarantee

- new interesting jobs every day
- sometimes boring routines, that should be automatized step by step
- collaboration with a team from different professions
- clients with new ideas
- working times you can plan with us

What we expect?

- documented practical experiences (theoretical knowledge is not enough)
- you are speaking/understanding English well. We support you in learning German quickly.
- You will explain complex technical backgrounds reasonable for our clients with sparse technical background.

You've more questions?

Call André Krüger: 0049 (0) 30 - 5056 1070.

You are interested?

Send us your CV with information about your experience via mail [personal@eledia.de](mailto:personal@eledia.de).
